SUMMARY

Junior Full Stack Developer with a Java and Spring Boot foundation. Builds REST APIs with authentication and role-based access on PostgreSQL, integrates AI agents (n8n, MCP) into automation workflows, and develops with agent assistance guided by specs, rules and skills. Trained as a Social Communicator and Journalist: listens to the client, translates business needs into technical requirements and explains technical decisions to non-technical audiences. Analyzes problems before solving them, documents what they build, learns quickly and works in Scrum teams.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, JWT, Spring Data JPA / Hibernate, REST APIs, OpenAPI / Swagger
Databases: PostgreSQL, MySQL, SQLite | **Other:** Python (OOP, Tkinter)
Frontend: HTML, CSS, JavaScript, TypeScript, Responsive design and UX, React (agent-assisted)
AI & Automation: n8n, AI agents, MCP servers, Agentic development (AGENTS.md, rules, skills)
Tools & Practices: Git, GitHub, Docker, Docker Compose, Maven, Scrum, SDD/TDD

SOFT SKILLS

Written and verbal communication · Translating business needs into technical requirements · Active listening · Technical documentation · Problem analysis and problem solving · Fast learning · Teamwork (Scrum)

EXPERIENCE

Junior Developer (Apprenticeship Contract) — Globant, via Campuslands | Jan 2026 – Present

- Training phase (Jan – Nov 2026): virtual technical reinforcement sessions.
- Productive phase (from Nov 2026, 6 months): joining development projects.

DEVELOPMENT PROJECTS

LogiTrack IQ — Inventory Control Tower (Campuslands) | Java, Spring Boot, PostgreSQL, n8n, MCP, Docker

- Extended LogiTrack API with detection of products below their reorder point and draft purchase orders (DRAFT → APPROVED → RECEIVED / CANCELLED), with transactional receiving.
- Integrated an AI agent (n8n + Gemini) that runs daily through an MCP server with 6 tools and no permission to approve orders: the final decision stays with an administrator.
- Generated order PDFs and a dashboard, orchestrated everything with Docker Compose and documented with SDD/TDD.

LogiTrack API — Warehouse Management Backend (Campuslands) | Java, Spring Boot, Spring Security, PostgreSQL

- REST API with JWT and roles (ADMIN / EMPLEADO) over 7 entities, handling movements between warehouses (inbound, outbound, transfer).
- Automatic auditing of INSERT / UPDATE / DELETE via JPA listeners, in an independent transaction; documented with OpenAPI / Swagger and a custom 9-view frontend.

Inventory Guardian — Inventory Management (Campuslands) | Python, SQLite, OOP

- Desktop app with a real-time dashboard of 5 metrics, low-stock alerts, search and light/dark mode.

PREVIOUS WORK EXPERIENCE

Sales Customer Service Representative — Majorel (Repsol campaign) | Nov 2024 – Mar 2025
Identified customer needs by phone and guided them to the right solution.

Legal Collections Operator — TUAVAL S.A.S. | Oct 2023 – Aug 2024
Portfolio recovery for the legal collections department.

Social Media Manager — Recíclalo App (SUEMA) | Aug 2021 – Dec 2021
Campaigns with partner brands, content calendar, metrics analysis and mobile app notifications.

EDUCATION

Technical Diploma in Software Development — Campuslands | Aug 2025 – Sep 2026
Bachelor's degree in Social Communication and Journalism — Universidad Sergio Arboleda | Aug 2017 – Mar 2023

ADDITIONAL CERTIFICATIONS

Programming Bootcamp, Basic Level — Talento TECH (MinTIC & ANDES) | 159 h | Mar 2026
Introductory Course on AI-Assisted Development — BIG school (MoureDev) | 4 h | Oct 2026
Diploma in Strategic Digital Communication — Universidad Sergio Arboleda | 88 h | Apr 2022
Workplace and life skills workshops — Comfenalco Santander | 80 h | 2025

LANGUAGES

Spanish (native) · English B1 (iTEP Plus Academic, 2022)
